

Chief Information Security Officer (CISO) as-a-Service

Acquire the essential qualifications of a CISO to lead and direct your cyber security management without the need to incur the high overhead cost of a full-time CISO

Why Heron

Expertise

Bridging IT, business and people to mitigate cybersecurity risks and incidents through all organisation levels that are aligned with financial and business goals

Experience

Decades of experience in working in and with Enterprises and Government agencies and understand what it takes to defend against sophisticated threats

Collaborative

Working hand-in-hand with your Board and Executive Management to strengthen your cyber security maturity and minimise the impact of cyber risks on your business

What We Do

We provide you with access to a pool of global cyber security expertise and industry knowledge that fit the requirements of your organisation. As your company grows, CISO-as-a-Service is an essential and cost-effective extension to your information security capabilities, allowing you to acquire the essential qualifications of a Chief Information Security Officer (CISO) to lead and direct your cyber security management without the need to incur the high overhead cost of a full-time CISO.

A CISO operates at the Board and Executive levels to support you on:

- Governance, Risk & Compliance (GRC)
- Security Policy & Strategy Development
- Technology Risk Management
- Mergers & Acquisition Risk
- Insurance Risk
