# Cyber Security
## Capabilities & Services

Connected, Safe & Secure

"There are only two types of companies: those that have been hacked, and those that will be."

– Robert Mueller (FBI Director, 2012)

# Our Mission
## in Cyber Security

### Across Cyberspace

We are your first line of defence against the unseen threats of data theft, financial crime, and operational disruption in an ever-more complex, interlinked, and digitalised world.

Trusted by high-trust organisations—government agencies, multinational companies, financial institutions, and critical service providers—we perform on a global level against high-risk cyber threats.

From advising on risk and compliance, and providing managed security services, to performing tests and audits, we deliver our vision of a secure cyber world for people and organisations to thrive and grow in. No matter how that world evolves, we position ourselves to always stay ahead: cybersecurity that works for you, changes with you.

# Our History
## in Cyber Security

**2022**

Established Security
Operations Centre
(SOC) in Singapore

Pivoted to Managed
Security Services
Provider (MSSP) model

Secured licenses for
Managed SOC
Monitoring Services
and Penetration
Testing from
Singapore Cyber
Security Regulatory
Office

**2020 to 2021**

Accredited by CREST
in cyber security
penetration testing

Renamed as Heron
Technology following
management buyout

**2018**

Awarded grant by
Singapore National
Research Foundation
to research into drone
system cyber security

**2017**

Nova Systems
(Singapore)
established

Commenced cyber
security business

# Our Services

"Amateurs hack systems. Professionals hack people."

- Bruce Schneier
*Security Technologist*

## ADVISORY & CONSULTANCY

- Strategic Advisory
- Security Management
- Project Consultancy

## MANAGED SOC SERVICES

- Managed Detection & Response
- Threat Hunting
- Dark Web Monitoring

## DATA & PRIVACY PROTECTION

- Data & Privacy Compliance
- Data Protection-as-a-Service

## SECURITY ASSESSMENT & TESTING

- Vulnerability Assessment & Penetration Testing
- Red Teaming
- Secure Code Review

# Products

In partnership with category-leading and innovative technology vendors, we offer you a range of cybersecurity products to fulfil your needs and requirements.

Our product offerings include:

- Active Directory Protection (ADP)
- Asset Inventory Management
- Compliance Monitoring
- Data Diode
- Data Loss Prevention (DLP)
- Email Protection
- Hardware Encryption
- Insider Threat Management (ITM)
- IoT Security
- OT Security
- Unified Endpoint Management

# Our Credentials

## Accreditations & Certifications

CREST

ISA — GLOBAL CYBERSECURITY ALLIANCE

TÜV SÜD — ISO 9001

## Professional Qualifications

CISSP — Certified Information Systems Security Professional

CompTIA. Security+ CERTIFIED

CISA — Certified Information Systems Auditor. An ISACA® Certification

CISCO CERTIFIED CCNA

GXPN — GIAC EXPLOIT RESEARCHER AND ADVANCED PENETRATION TESTER

GREM — GIAC REVERSE ENGINEERING MALWARE

OFFENSIVE security OSCE

OFFENSIVE security OSCP

EC-Council CERTIFIED C|EH — CERTIFIED ETHICAL HACKER

CCSK v.4 — CERTIFICATE OF CLOUD SECURITY KNOWLEDGE — CLOUD SECURITY ALLIANCE

# Our Projects

## Advisory & Consultancy

**Security Surveillance System**

**4G Network System**

**Transport Commuter Analytics & Wifi System**
